Item # 5031 Plymetal, Plymetal & Custom Laminate Brazing Alloys

Used historically as the primary composition for brazing carbide to steel. It's use has become limited due to the presence of cadmium. Displays exceptional strength and flow characteristics.

[Specifications](#) · [Custom Laminates](#)

Specifications

Melting Pt.	1170 °F
Flow Pt.	1270 °F
Preform Options	Brazing Discs Brazing Shims Brazing Washers Custom Designs
Pricing & availability	Bellman-Melcor distinguishes itself as a provider of premium quality brazing alloys at industry competitive prices. Our extensive inventory of brazing and soldering alloys ensures that in most cases your order can be available for immediate delivery.

Custom Laminates

In addition to our plymetal brazing alloys, Bellman-Melcor delivers precision custom laminates for a variety of uses. By layering brazing or soldering alloys with base metals, an infinite combination of precision engineered products are possible. Contact our technical support department for further info.
